- ⑦ Record macro
- ⑧ Macro setting

RGB Lighting Setting

- ① The effects of lighting.
- ② Customized the RGB color.
- ③ The RGB lighting speed.

Mouse Parameter

1. The sensitivity of mouse
2. Velocity of displacement of the wheel
3. Double click speed

Polling rate (Hz)

The polling rate of a mouse is how often it reports its position to a computer.

A higher polling rate can decrease the time lag between when you move the mouse and when the movement appears on the screen.

On the other hand, a higher polling rate will use more CPU resources
