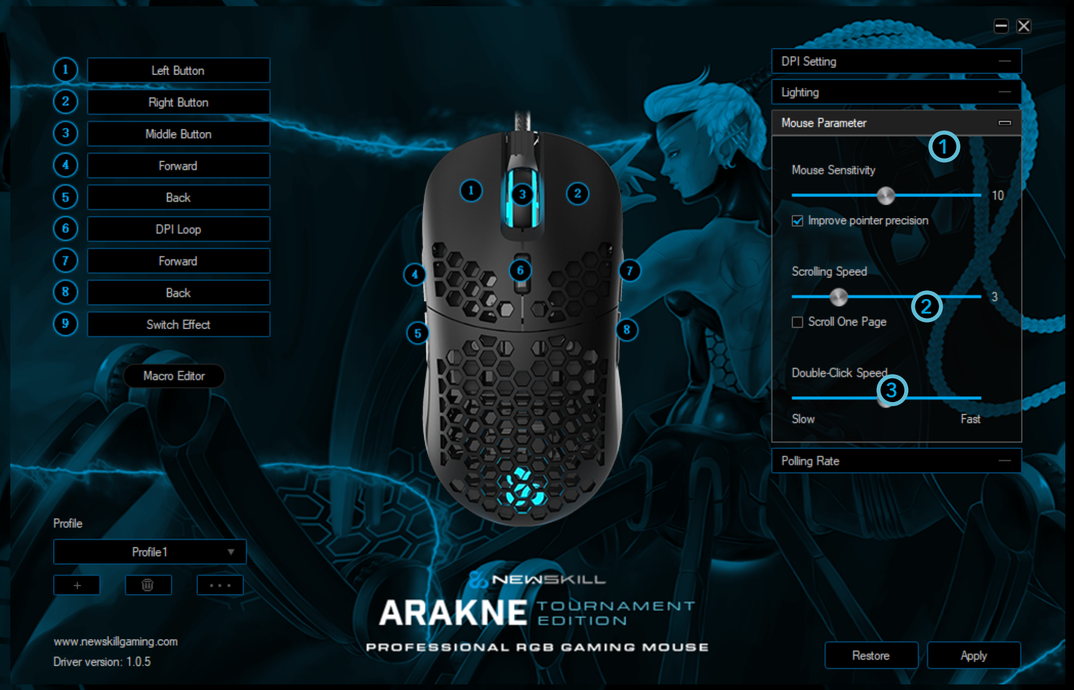
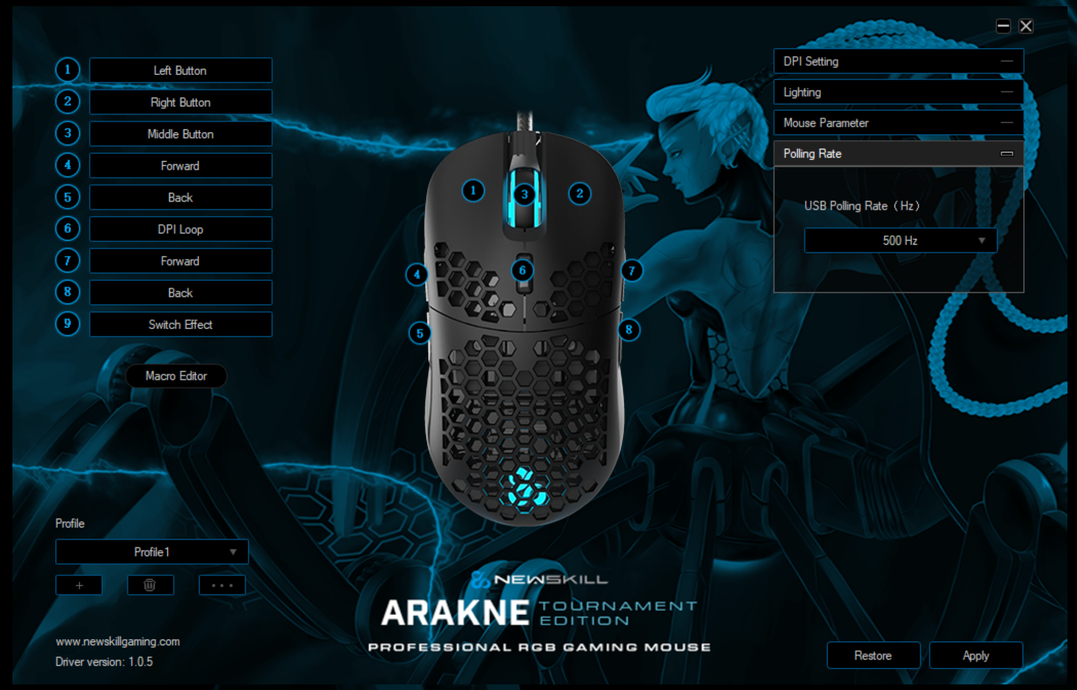
② Customized the RGB color.
③ The RGB lighting speed.

NEWSKILL ARAKNE TOURNAMENT EDITION



Mouse Parameter

1. The sensitivity of mouse
2. Velocity of displacement of the wheel
3. Double click speed



Polling rate (Hz)

The polling rate of a mouse is how often it reports its position to a computer.

A higher polling rate can decrease the time lag between when you move the mouse and when the movement appears on the screen.
On the other hand, a higher polling rate will use more CPU resources
